

RSG Policy Reconciliation — Process Diagrams

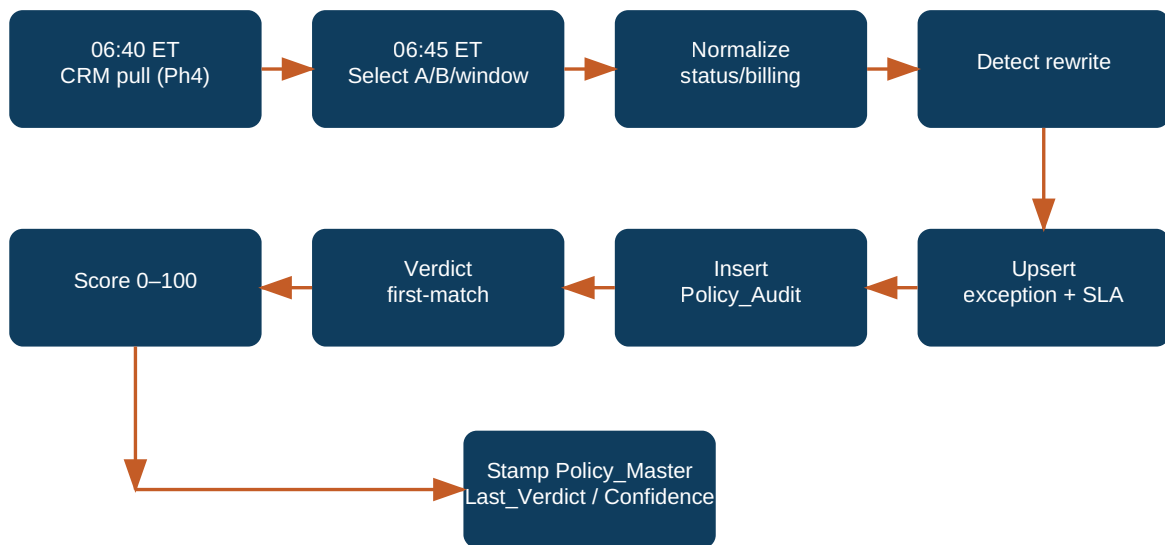

Six required flows. Implement these in Deluge; do not substitute.

1. Systems of record

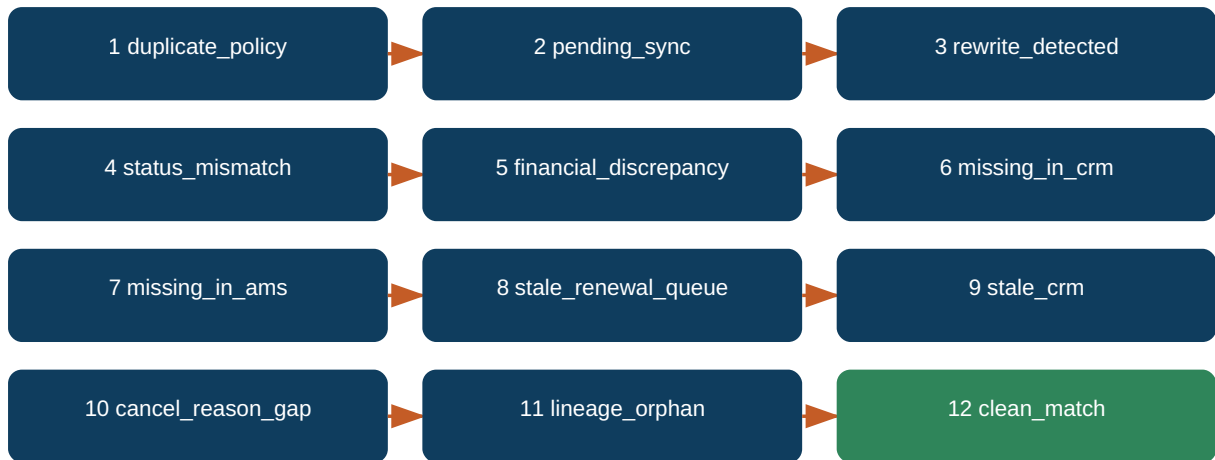

Creator copies AMS facts, stamps CRM IDs, never writes NowCerts, writes CRM only with approval.

2. Daily reconciliation (one Run_ID)

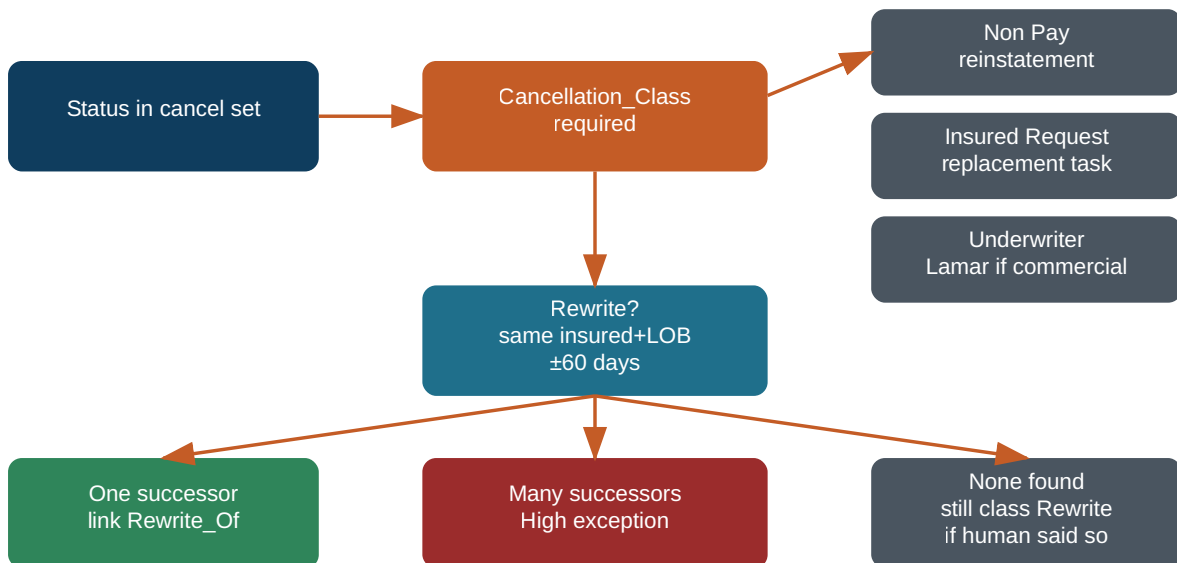

3. Verdict decision tree (order)

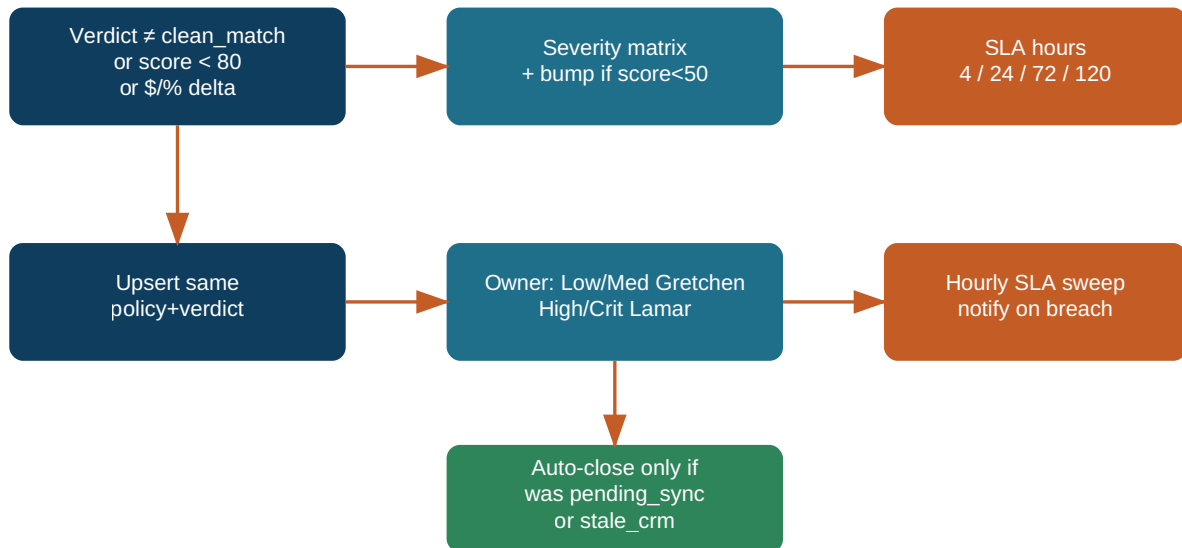

First match wins. Do not add or rename types.

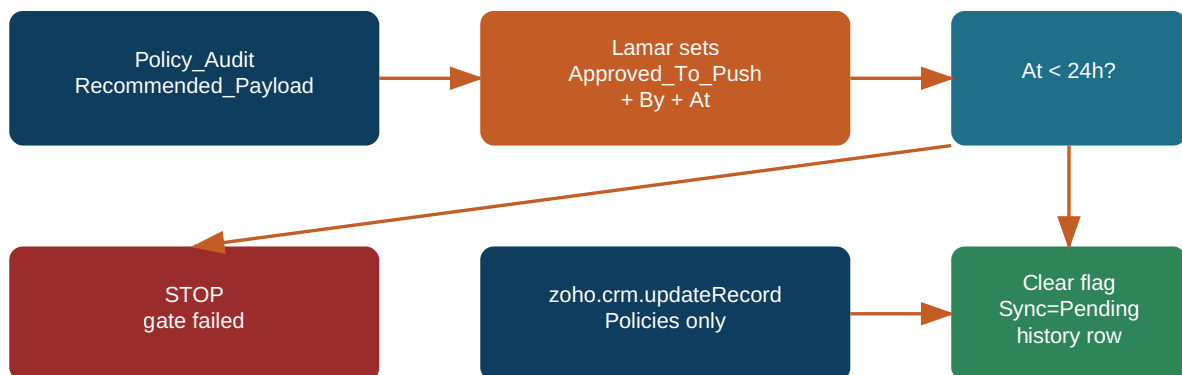

4. Cancellation and rewrite

5. Exception and SLA

6. Approval-gated CRM write

Never create Accounts. Never call NowCerts from Creator. Policy create drafts stay human.
